Starting from 1 July 2018 (included) to the earlier of (a) the Early Redemption Date (excluded); and (b) the Final Maturity Date (excluded), interest accrued (expressly excluding the Default Interest) and will accrue on the Principal Amount Outstanding of the Notes, at the New Interest Rate, and will be paid in Euro, in arrear, on each Interest Payment Date, starting from the first Interest Payment Date, without prejudice to Condition 6.2.

Interest accrued on the Principal Amount Outstanding of the Notes will be calculated by the Calculation Agent on each Interest Determination Date.

Interest shall cease to accrue on any part of the Principal Amount Outstanding of the Notes from the due date for redemption of such part (included), unless payment of principal due and payable but unpaid is improperly withheld or refused, whereupon interest shall continue to accrue on such principal (as well after as before any judgment) at the rate from time to time applicable to the Notes.

5.2 Interest Rate

Starting from 1 July 2018 (included) to the Final Maturity Date (excluded), the amount of the semi-annual coupons shall be calculated on the basis of the following formula:

$$C = NV (6 \text{ month EURIBOR Rate} + 1.50 \%) \times \text{Day Count Fraction}$$

"**NV**" means the Nominal Value

On any Valuation Date (starting from the Valuation Date falling in 2021 (included)), should the value related to the EBITDA of the Issuer result to be higher than the one envisaged by the Plan by 10% or more, as from the first day of the Interest Calculation Period following the relevant Valuation Date, the New Interest Rate will be increased by an additional spread of 50 *basis points* (the "**Additional Spread**"). As a consequence of the application of the Additional Spread, the amount of the semi-annual coupon shall be calculated on the basis of the following formula:

$$C = NV (6 \text{ month EURIBOR Rate} + 1.50 \% + \text{Additional Spread}) \times \text{Day Count Fraction}$$

"**NV**" means the Nominal Value

"Euribor" means the 6 months rate at which wholesale funds in euro could be obtained by credit institutions in the EU and EFTA countries in the unsecured money market. It is administered by the European Money Markets Institute (EMMI). For the relevant 6 months period, EURIBOR is published daily on every TARGET day, at or shortly after 11 a.m. CET for each of the defined tenors and the rate will be displayed on page EURIBOR01 of the Reuters screen (or any replacement Reuters page which displays that rate), or on the appropriate page of such other information service which publishes that rate from time to time in place of Reuters. If the relevant screen page is not available, the Calculation Agent shall request each of the three leading banking operators in the European Union, to provide the Calculation Agent with its bid rate or offered quotations for the EURIBOR at or shortly after 11 a.m. CET. The Calculation Agent with such bid rate or offered quotations, will determine the arithmetic mean (rounded if necessary to the fifth decimal place) of the bid rates or offered quotations. If on any Interest Determination Date less than three or none of the leading banking operators in the European Union provides the Calculation Agent with such bid rates or offered quotations, the interest Rate for the relevant Interest Calculation Period shall be the rate per annum which the Calculation Agent determines as being the arithmetic mean (rounded if necessary to the fifth decimal place) of the rates, as communicated to (and at the request of) the Calculation Agent by the leading banking operators in the European Union or any two or more of them at which such banks were offered, at approximately 11 a.m. CET., deposits in Euro for a period equal to that which would have been used for the EURIBOR by leading banks in the Euro-zone inter-bank market. Should the Euribor rate be negative, the parties conventionally agree that it shall be considered at a value equal to zero.

The EURIBOR has been qualified as a critical benchmark and may be subject, in the future, to cessations or changes in the calculation method in relation to one or more tenors, as already occurred on 14 June 2018 when EMMI approved the cessation of the 2 week, 2 month and 9 month tenors. Therefore, if EURIBOR cannot be determined in according with the foregoing provisions , EMMI will identify an acceptable substitute benchmark, in compliance with article 28(1) of the European Regulation 2016/1011. Until such substitute benchmark has not been identified, the Calculation Agent will use the last recorded value of the EURIBOR.

Should the Issuer fail to pay any amount payable by it in relation to the Notes, it shall pay the Interest Rate on the overdue amount plus a margin of 2% (two per cent) *per annum*, in accordance with the applicable regulation (the "**Default Interest**"), to be calculated by the Calculation Agent from the date on which this payment should have been made (included) until the date of actual payment (excluded).

If the relevant Interest Rate and / or the relevant Default Interest exceed the limits provided by the Usury Law, they shall be deemed automatically reduced (for the period strictly necessary) to the maximum interest rate allowed by such law to be calculated by the Calculation Agent.
