• **TERNIENERGIA: clarification on the agreement to build microgrids in India**

TerniEnergia, in relation to the press release disseminated today, clarifies that the contract subscribed with an Indian company part of Juice Power Group, is referred only to the construction of the first three micro-grid plants for a total installed power of 3.5 MW and a consideration of approximately USD 3 million. The consideration of USD 10 million, previously mentioned, is referred to the entire first phase of a pipeline already defined for a total power installed of approximately 8.5 MW.

The contract, preparatory to the signing of an EPC framework agreement that will cover the successive stages of construction and upgrade of the plants, provides also for the implementation of engineering activities related to three photovoltaic plants with a total installed power of 3.5 MW and for the energy audit activity and the implementation of charging and storage technologies, smart control and management systems, as will be provided for the remaining 5 MW of the same first phase of the aforementioned pipeline.

**TERNIENERGIA (TER.MI)**, established in September 2005, and part of Italeaf Group, is the first Italian smart energy company, committed to bring worldwide integrated and sustainable energy solutions. Organized into four business lines (Technical services, Energy management, Energy efficiency and Cleantech), with about 500 employees and a geographic presence in almost the continents, with operational and sales offices, TerniEnergia develops solutions, innovative products and services based on digital and industrial technologies for the energy sector.

TerniEnergia, also through its subsidiaries, shall pursue the objectives of increasing energy production from renewable sources, energy efficiency and emissions reduction, as laid down by European environmental policy, and participates actively in the distributed power generation revolution and energy smart grids.

TerniEnergia is the ideal partner for large utilities, distributors and grid operators, power producers, public authorities, industrial customers and investors who intends to carry out large projects for the production of renewable energy plants and modern systems with high energy efficiency, solutions for the management and maintenance of the infrastructure and the electrical systems. TerniEnergia, through a complete technological and commercial offer, develops and provides technologies, turn-key services and solutions for energy consumers in the public and private sectors. The company is listed on the STAR segment of the Italian Stock Exchange.
