

PRESS RELEASE
Terni, October 5, 2017

**TerniEnergia: Softeco Sismat leading IMOVE, the European initiative
for the smart mobility**

- **The Group's digital company at the head of a research project on the "Mobility as a service" paradigm, which received funding of approximately €3.7 million under the Horizon 2020 community programmes.**
- **Softeco Sismat will receive Euro 0.9 million for the development of smart city solutions**

TerniEnergia announces that **Softeco Sismat**, the Group's digital company, is at the head of the **IMOVE** research project (Unlocking Large-Scale Access to Combined Mobility through a European MaaS Network), co-funded by the EU's Horizon 2020 programme and aimed at experimenting and validating the Mobility-as-a-Service (Maas) model, through pilot projects in different European cities and regions.

The project has a total cost of about 3.7 million Euros, fully financed by the European Union. EU funding to Softeco amounts to Euro 0.9 million.

Softeco Sismat acts as coordinator of a consortium of 14 partners from 8 European countries, including leading research institutions, the cities of Berlin, Gothenburg, Manchester and Turin, UITP, the International Association of Public Transport Authorities and Operators. The project will have a duration of 30 months.

Beside confirming its position as a European leading player for research and innovation in the sector of sustainable mobility, thanks to IMOVE Softeco will consolidate its competitive advantage and will further develop its offering of ICT and as-a-service products and solutions for sustainable mobility, a market segment already addressed by Softeco through a rich and articulated offering and an area of a rapidly growing interest for mobility operators and public authorities engaged in the development of advanced solutions for the smart city.

An emerging model for the provision of smart, personalised and sustainable mobility schemes, Mobility-as-a-Service (MaaS) will allow citizens to benefit from advanced, integrated services combining multiple operators and service providers, public and private schemes, collective and individual transport, sustainable modes including vehicle sharing, lift sharing and electric mobility. A MaaS scheme is able to offer ad hoc, integrated "mobility packages" flexibly adapted to users' needs and accessible according to multiple booking-payment-use models - from flat-rate subscription to travel packages, pay-per-use, etc. - meeting the specific requirements and interests of travellers.

PRESS RELEASE

Terni, October 5, 2017

This press release is also available on the Company's website: www.ternienergia.com.

TERNIENERGIA (TER.MI), established in September 2005, and part of Italeaf Group, is the first Italian smart energy company, committed to bring worldwide integrated and sustainable energy solutions. Organized into four business lines (Technical services, Energy management, Energy efficiency and Cleantech), with about 400 employees and a geographic presence in almost the continents, with operational and sales offices, TerniEnergia develops solutions, innovative products and services based on digital and industrial technologies for the energy sector.

TerniEnergia, also through its subsidiaries (Softeco Sismat, Selesoft, Greenled Industry, GreenAsm, Wisave, Ant Energy), shall pursue the objectives of increasing energy production from renewable sources, energy efficiency and emissions reduction, as laid down by European environmental policy, and participates actively in the distributed power generation revolution and energy smart grids.

TerniEnergia is the ideal partner for large utilities, distributors and grid operators, power producers, public authorities, industrial customers and investors who intends to carry out large projects for the production of renewable energy plants and modern systems with high energy efficiency, solutions for the management and maintenance of the infrastructure and the electrical systems. TerniEnergia, through a complete technological and commercial offer, develops and provides technologies, turn-key services and solutions for energy consumers in the public and private sectors. The company is listed on the STAR segment of the Italian Stock Exchange.
