

**PRESS RELEASE**  
**Terni, May 22, 2018**

---

**TERNIENERGIA: Softeco Sismat participates in the "PickUp" project for efficient and flexible energy management in urban districts**

- **The Group's digital company in a cluster of companies that has obtained a grant of Euro 1 million from the Liguria Region**
- **Expected the development of innovative solutions for the energy and environmental management of heterogeneous urban districts, to increase flexibility and autonomy aimed at reducing energy consumption and their environmental impact**

**TerniEnergia**, smart company listed on MTA of Borsa Italiana and part of the Italeaf Group, announces that Softeco Sismat, the digital company of the Group, participates in the "PICK-UP" project (IoT Sensor Integration Platform for the Control of Energy KPIs in the Urban Area and the Planning of Energy Efficiency Interventions and Integration with Microgrid), funded under the call for proposals POR FESR 2014-2020 Axis 1 "Research and Innovation" - Action 1.2.4 - Scope "Safety and Quality of Life" - as per the ranking published by FILSE ([www.filse.it](http://www.filse.it)), the Ligurian Financial Company for Economic Development, a technical entity that supports and assists the Liguria Regional Authority and other Ligurian local authorities in the planning, definition and implementation of policies and measures to support the Ligurian economic system.

The two-year project, lead by Gruppo SIGLA srl, will receive a total grant of over Euro 1 million and involves, in addition to Softeco Sismat, Impara S.r.l., MAPS S.p.A., ABB S.p.a., Flairbit S.r.l. and Stam. The financing confirms the constant commitment of the company in the development of innovative solutions in the Energy & Environment field (<http://www.research.softeco.it/energy.aspx>) and in the continuous technological transfer in solutions for its customers (<http://www.softeco.it/linee-business/energy-utilities/>).

The PICK-UP project envisages the creation of an innovative tool for the energy and environmental assessment of heterogeneous urban districts, aimed at reducing energy consumption and their environmental impact. The main areas of innovation considered are:

- the definition of new models for interpreting energy data;
- the development of predictive control methods for greater energy efficiency and integration with microgrids;
- the identification and testing of models for the aggregation and integration of distributed generation sources to increase flexibility with respect to the national energy system (Demand Response).

## **PRESS RELEASE** **Terni, May 22, 2018**

---

*This press release is also available on the Company's website: [www.ternienergia.com](http://www.ternienergia.com).*

**TERNIENERGIA (TER. MI)**, established in September 2005 and part of the Italeaf Group, is the first Italian global technological enabler, committed to bringing energy solutions and efficient recovery of integrated and sustainable resources to the world. Organized into two strategic business lines (Assets and Smart solutions and services), with about 400 employees and a geographical presence worldwide, with operative and commercial offices, TerniEnergia develops innovative solutions, products and services based on digital and industrial technologies for the energy supply chain, grids, smart mobility, industrial automation and the recovery of marginal resources.

TerniEnergia, also through its subsidiaries (Softeco Sismat, Selesoft Consulting, Greenled Industry, GreenAsm, GreenAsm, Purify, Wisave, Ant Energy), pursues the objectives of increasing energy production from renewable sources, saving energy and reducing emissions and actively participates in the energy revolution of distributed power generation and smart grids, with innovative digital solutions.

TerniEnergia is the ideal partner for large utilities, distribution operators and network operators, energy producers, public administrations, industrial customers and investors who intend to realize large projects for the production of renewable energy, modern systems and plants with high energy efficiency, solutions for the management and maintenance of infrastructure and electrical installations.

TerniEnergia has completed its transformation from a leader in the international photovoltaic market into a smart energy company and technological enabler for the sustainable use of resources through a complete commercial offer of solutions, the development and supply of digital technologies and the creation of "intelligent" services and solutions aimed at public and private customers in emerging sectors.

TerniEnergia is listed on the MTA of Borsa Italiana.
