TERNIENERGIA: the “giant” construction sites in South Africa in line with the time schedule

- **The energy management business activity is in line with the forecast of the business plan "Fast on the road smart energy"**
- **Appointed the new Board of Directors of New Gas Trade Srl: Sergio Agosta new Chairman, Fabrizio Prestinoni confirmed CEO**

Terni, June 8, 2015

TerniEnergia, smart energy company active in the fields of renewable energy, energy efficiency, waste and energy management, listed on the Star segment of the Italian Stock Exchange and part of Italeaf Group, announces that the progress of work of the two "giant" sites in South Africa, on behalf of a leading Italian utility, is in line with the timetable envisaged by the final contracts for the EPC (engineering, procurement and construction) and O&M (operation and maintenance) communicated to the market on 31 July 2014.

In particular, TerniEnergia Projects PTY Ltd, the South African subsidiary of TerniEnergia SpA, has completed all phases of construction (delimitation of the intervention, preparation of the necessary logistics services, network implementation plant, etc.) of the construction sites of Tom Burke (67 MWp) and Paleisheuwel (82.5 MWp), also completing the preparation of the ground for the installation (in total 350 hectares), and starting the foundation works for the photovoltaic systems. With regard to the construction site of Tom Burke, on the border with Botswana, it was put in place an action to safeguard flora and fauna, in full compliance with the strict standards for environmental protection in South Africa. The construction site of Paleisheuwel, however, is located in the Southwest of the country in an almost totally desert area.

TerniEnergia informs also that the performance of the "Energy management" business line, marked by value-added services for large electricity consumer customers in Italy, is in line with the forecasts of the business plan "Fast on the road smart energy" presented to the market last February 9. In terms of activities of the business line "Cleantech" is noted, however, the near completion of the construction site for the installation of the recovery of endo of life tyres at Borgo Val di Taro, for which is expected to start business in the third quarter of this year.

PRESS RELEASE Terni, June 8, 2015

Finally, TerniEnergia communicates that has been appointed the new board of directors of New Gas Trade, which operates in the upstream sector of the natural gas and liquefied natural gas, as part of the integrated management of energy commodities. The new Board of Directors, following the acquisition by TerniEnergia of 85% share capital of NGT, is formed by Sergio Agosta, chairman, Fabrizio Prestinoni, confirmed CEO, and Andrea Polichetti, non-executive director. The target of the new Board will be to implement the strategic decisions of the Group entering the market "dual fuel", enabling an effective business tool retention and development of new customers, leveraging the opportunity to reach a customer base of over 25,000 players, between direct and indirect customers, increasing the supply of energy products and guaranteeing a real saving on the "cost component" also thanks to the energy efficiency of the Group.

This press release is also available on the Company's website: www.ternienergia.com.

TerniEnergia, a company incorporated in September of 2005 and part of Italeaf Group, is the first Italian smart energy company and operates in renewable energy, energy efficiency, energy and waste management. TerniEnergia operates as system integrator, with a turn-key offer of industrial sized photovoltaic plants, on behalf of third parties and on its own, for the Power Generation business, also through joint venture companies with leading national players. TerniEnergia operates in the waste management sector, recovery of the material and energy, development and production of technologies. In particular, the Company is active in the recovery of tires out of use, in the treatment of biodegradable waste through the implementation of biodigesters, management of plant for the biological depuration; decommissioning of industrial plants, recovery of demolition metals and cleaning of industrial sites; development and production of technological apparatus. Through Free Energia, the Group is active in the energy management, energy sales to energy intensive customers, software and services for energy management, administrative, financial and credit management. TerniEnergia, through Lucos Alternative Energies, operates in the development of energy efficient plants both through EPC scheme and FTT scheme (Financing Through Third Parties), pursuing the objectives of increasing energy production from renewable sources, of energy saving and reduction of emissions as set forth by environmental European policy. TerniEnergia is listed on STAR segment of Borsa Italiana S.p.A..
